

WATPHOU TRAVELS

New Website Project – Complete Brief for Webmaster

WordPress + Kinsta • Multi-language (EN / FR / TH)
Prepared for the Sales & Marketing meeting and website migration

1. Project Overview

Current website: <https://www.watphou-travels.com/> (Wix platform). We are migrating to **WordPress** hosted on **Kinsta (Basic plan)**. A webmaster will handle the technical build and migration. After launch, the sales team will update content via the WordPress CMS.

Languages: Thai, English and French (full multi-language site).

Inspiration sites: vietnamdiscovery.com • authentikvietnam.com • izitour.com/en

2. Feedback on the Current Website

Strengths

- Detailed itineraries showing good local knowledge.
- Clear positioning on private (not group) tours.
- Positive reviews exist (Google + Petit Futé).
- Connection with Pakse Hotel is a real quality signal.
- Core products already cover Bolaven, Vat Phou and 4000 Islands.

Critical Weaknesses

- **No prices anywhere** — the biggest conversion killer. Travellers need a “From \$XX” to decide quickly.
- Homepage is a destination brochure, not a sales page.
- Navigation is unclear (typical Wix limitation).
- Package pages are long and flat — they describe “what you will see” instead of selling the experience.
- Weak CTAs (only “VIEW MORE”). No sticky WhatsApp button.
- Unique assets under-used: coffee expertise on Bolaven, European management, French-speaking capacity, hotel link.

3. Recommended Site Structure & Ergonomics

The new site must allow fast decision-making, a clear path from emotion → trust → action, and easy CMS updates by the team.

Main pages / sections:

1. Homepage (sales-focused)
2. Day Tours
3. Multi-day Tours (2–3 days / 4–7 days)
4. Destinations / Themes (Bolaven, 4000 Islands, Vat Phou & Champasak, Pakse)
5. Tailor-made / Custom Tours
6. About Us / Why Us (team + values)

7. Contact

8. Optional: Travel Guide / Blog (for SEO)

Technical notes: Clean WordPress theme (GeneratePress, Astra or quality travel theme) + Polylang or WPML for multi-language. Floating WhatsApp button on every page. Mobile-first, fast loading, high-quality optimized images.

4. Top Menu Structure

Recommended desktop menu:

Logo | Day Tours | Multi-day Tours | Destinations ■ | Tailor-made | About Us | Contact

Language switcher (EN | FR | TH) top right + phone number + WhatsApp icon.

Destinations dropdown: Bolaven Plateau • 4000 Islands (Si Phan Don) • Vat Phou & Champasak • Pakse & Surroundings

Keep the menu short (max 6–7 items). Mobile menu must be very clean and easy to use.

5. Homepage Wireframe (Priority 1)

5.1 Hero Section

Headline: Private Journeys into Authentic Southern Laos

Sub-headline: Discover the Bolaven Plateau, the ancient temples of Vat Phou and the peaceful 4000 Islands — with a local team and European standards.

Value line: Private tours • Flexible itineraries • From 1 day to 1 week

Primary CTA: Explore Our Best Sellers | **Secondary CTA:** WhatsApp us now

Use a strong emotional full-width image (Vat Phu at golden hour, Li Phi waterfall, Bolaven landscape or 4000 Islands sunset).

5.2 Our Best Sellers

Show 3–4 cards with large photo + title + duration + **starting price** + one short benefit sentence + “View details →”

- Bolaven Plateau Classic Full-Day — From \$XX – Cool highlands, waterfalls & authentic coffee culture
- Bolaven Plateau Classic – 2 Days / 1 Night — From \$XX – Waterfalls, markets, ethnic villages & overnight on the plateau
- 3-Day Classic Experience in Southern Laos — From \$XX – 4000 Islands + Vat Phou + Bolaven in one perfect journey
- 4,000 Islands & Vat Phou – 2 Days / 1 Night — From \$XX – River life, giant waterfalls and a UNESCO temple

5.3 Why Travel with Watphou Travels

4 arguments with icons:

- **Local expertise + European standards** — Lao team with French management based in Pakse since 2008
- **100% private tours** — Your own vehicle and driver — no shared groups
- **Authentic experiences** — Real villages, coffee plantations, and hidden corners most visitors never see
- **Transparent & flexible** — Clear starting prices with easy upgrades for comfort or guide

5.4 Real Client Reviews

Display 4–6 real Google reviews (stars + short quote + name + date). Button: “Read more reviews on Google”.

5.5 Contact Zone

Title: Ready to plan your Southern Laos journey?

Large WhatsApp button + short contact form (Name, Email, Dates, Message) + phone number. Make WhatsApp extremely visible on every page.

6. Pricing Strategy (Priority 2)

Display **low starting prices** based on more economical hotels. Clearly write on every package page:

“From \$XX per person – Standard accommodation. Comfort upgrades available”

This approach filters serious clients and supports upselling. After the first contact, the sales team sends higher-value options by WhatsApp/email. Prepare for each package: price for 2 pax (standard), 3–4 pax, 5–6+ / group, optional guide supplement, and hotel upgrade options.

7. Package Page Structure (Priority 3)

Use this exact structure for every package page:

1. Emotional headline + main benefit
2. Starting price clearly visible at the top (“From \$XX – Standard. Comfort upgrades available”)
3. Short dream paragraph (maximum 2–3 sentences) focused on feeling and uniqueness
4. Key highlights (4–6 bullet points with icons)
5. Detailed day-by-day itinerary (with photos)
6. What’s included / What’s not included
7. Optional upgrades (guide, better hotels, activities...)
8. Strong CTAs (Request this tour / WhatsApp / Get personalized quote)
9. Related tours

8. Suggested Core Packages (7–8)

Focus the homepage and main menu on the top 4. Keep the others visible but secondary. Tailor-made should always be easy to find.

10. Final Notes for the Webmaster

- Design should feel modern, clean and trustworthy — closer to the three inspiration sites than the current Wix site.
 - All package pages must follow the same structure so the sales team can easily update content later.
 - Prices will be provided by the client once new quotes are ready. Use “From \$XX” placeholders for now.
 - Multi-language must be properly implemented (not just machine translation). Key pages first: Homepage, main packages, About, Contact.
 - WhatsApp floating button is mandatory and must be highly visible on mobile.
 - After launch, the client's team will manage day-to-day content updates via the WordPress CMS.
